COMPACT FOLD-UP DESIGN :

Our solar power solutions are designed for applications where weight and size are at a premium. We recommend combining an appropriate panel with a rechargeable battery. This way, you can charge slowly all day and use the power anytime. Batteries can be trickle charged and can supply higher levels of power when you need it – even at night.

26-Watt Panel shown right with Powerbase battery (notebook battery not included but shown for scale)

Features:

- **Alligator clip adapter** for charging car batteries
- **Cigarette Lighter barrel adapter** for equipment with auto accessory chargers
- **Mini-Barrel plug multi-adapter**
- **Compatible with Solo 7.5Ahr rugged battery** (not included)

SOLARPORT WITH BUILT-IN BATTERY

Our solar power solutions are designed for applications where weight and size are at a premium. We have combined a NIMH battery, the 4.4 W Solar Port battery, and a durable nylon “belly bag”. The belly bag is large enough to carry an Iridium or Globastar phone, the panel and the battery. You have everything you need to recharge your phone or other small electronics that have auto accessory chargers.
