

Iridium 9575 Extreme

The Iridium 9575 Extreme is tougher and more weather resistant than any previous Iridium model — surprising at only 8.7 oz. In addition to voice, data, and short messaging, it offers GPS position information, a GPS-enabled S.O.S. button, and optional online tracking services via a web portal. The shielded S.O.S. button lets you communicate your GPS position to others via text and/or voice communication with a simple button press. This feature makes the Iridium 9575 Extreme the first handheld satellite phone compatible with the Satellite Emergency Notification Device (S.E.N.D.) standard. Diamond-tread rubber armor gives you a non-slip grip and gives the Iridium 9575 Extreme a remarkable IP65 ingress protection rating.
